

## How's The Weather

**1.Labels:** Create two labels: Hot Weather, Cold Weather.

**2.Examples:** Add at least 5 examples for Hot Weather : Hot, Sunny, Ice Cream... and 5 examples for Cold Weather: Cold, Freezing, Jackets...

**3.Train:** After Adding the examples, Train your model on the dataset you created.

**4.Test:** Test your model and check the results, Above 70% on all your tests is recommended

**5.Play:** In Scratch, Go To extensions:

- Add Alex's extension to your Home Screen
- Select the Alex block.
- Add conditional if else statements
- Create a character that will change clothes based on the results.
- Enjoy!
